#### **EXECUTIVE SUMMARY:**

Ghana signed on to the Extractive Industries Transparency Initiative (EITI) in 2003 and has since been implementing the initiative in the mining sector.

The Extractive Industries Transparency Initiative (EITI) is an International Initiative between governments, companies and civil society groups to promote transparency in the flow of revenues from extractive companies to host country governments based on a set of criteria for transparent reporting on the revenue streams and other benefits.

Under the EITI rules, the Ghana Extractive Industries Transparency Initiative (GHEITI) is required to produce annual reconciliation reports that reconcile the payments by the extractive sector companies to receipts by the government of Ghana.

Messrs' Boas and Associates was engaged by GHEITI to produce the 2010 and 2011 reconciliation reports for the mining sector.

#### **APPROACHANDMETHODOLOGY:**

The report was phased into two main areas: **Inception** and **Reconciliation**.

*Inception Phase*: This is the preliminary information gathering stage. The Aggregator interacted with Mining companies, Government Revenue Agencies and District Assemblies. An inception report was issued after this phase.

**Reconciliation Phase**: This represented the main thrust of the assignment. Activities in this phase included the following:

- Data Collection:
- **Data reliability check:** Data collected from paticipating entities was scrutinised to ensure that they fully meet the requirements set out for the completion of templates
- Analysis:
  - -Ascertaining the correctness of computations and payments received by each of the agencies with respect to the revenue or benefit streams.
  - Ascertaining the correctness of transfers of mineral royalty to District Assemblies and the Mineral Development Fund.
  - -Assessing the utilization of funds transferred to the District Assemblies.
- Data Aggregation and Reconciliation: Templates completed for Government and Mining Companies were compared and reconciled.

# • Participating Entities:

# Ministries, Departments and Agencies.

- Ghana Revenue Authority (Domestic Tax Revenue Division)
- Ghana Revenue Authority (Customs Division)
- The Administrator of Stool Lands.
- The Minerals Commission
- The Municipal and District Assemblies within the area of operation of the mines covered under the assignment.
- The Ministry of Lands and Natural Resources.
- Non Tax Revenue Agency (Ministry of Finance and Economic Planning).
- District Assemblies.

Source: Companies and Government Agencies templates/submissions

# > Discrepancies:

The reconciliation report for 2010 and 2011 produced some discrepancies that should be investigated further. Absolute discrepancies for 2010 and 2011 were GHS 47,460,012 and GHS 202,828,263 respectively. Unresolved discrepancies amounted to **GHS -5,080,964** and **GHS 9,113,673** in 2010 and 2011 respectively.

#### Highlight: Corporate tax receipts exceeded royalty in 2011.

This is very significant as it may mark the end of the initial investment recovery periods for major producers

# Some significant Findings included:

- -Payment of royalty using hedged sales figures in the payment of royalty.
- -The inconsistent frequency in payment of mineral royalty
- -The unwillingness of companies to provide information beyond payments made to government.
- -Payment of disbursed funds to district Assemblies in tranches.

#### **▶** Recommendation

The relevant Agencies including the GRA and the OASL as well as the Steering Committee of the Ghana EITI have been advised to address the findings and discrepancies.

#### 1.0 BACKGROUND

Ghana signed on to the Extractive Industries Transparency Initiative (EITI) in 2003 and has since been implementing the initiative in the mining sector.

The Extractive Industries Transparency Initiative (EITI) is an International Initiative between governments, companies and civil society groups to promote transparency in the flow of revenues from extractive companies to host country governments based on a set of criteria for transparent reporting on the revenue streams and other benefits.

The purpose of the initiative is to encourage greater transparency in the extractive sector. This would enable citizens to make informed demands for the fair and sustainable use of revenues generated through the exploitation of natural resources.

Under the EITI rules, Ghana Extractive Industries Transparency Initiative (GHEITI) is required to produce annual reconciliation reports that reconcile the payments by the extractive sector companies to receipts by the government of Ghana.

Messrs' Boas and Associates have been engaged to produce the 2010 and 2011 reconciliation reports for the mining sector.

The assignment involves the collection, analysis and aggregation of payments made by mining companies to the Government of Ghana and to ascertain the disbursements made by the Government to the relevant mining communities and its utilization. This report is prepared for the use of the Steering Committee of the EITI, and is not intended for any other purpose.

#### 1.1 GHEITI and EITI reports:

GHEITI has issued reconciliation reports for 2004 to 2009.

#### 1.2 THE MINING INDUSTRY IN GHANA.

The Mining industry in Ghana makes a significant contribution to the economy.

Under the Minerals and Mining Act, 2006, Act 703, every mineral in its natural state in, under or upon any land in Ghana, rivers, streams, water courses throughout the country, the exclusive economic zone and any area covered by territorial sea or continental shelf is the property of the Republic of Ghana and is vested in the President in trust for the people of Ghana.

Gold mining remains the highest contributor in the sector, with large scale gold mining accounting for over 80% by value of the total income from the sector. The other important minerals are, diamond, bauxite and manganese.

In 2009, the GRA received over GHS 96m as mineral royalty.

#### 1.3 BRIEF ON EITI IN GHANA.

The EITI Steering Committee is the governing body of the EITI in Ghana. Various stakeholders in the Extractive industry are represented on the committee.

The members of the committee comprise of representatives from the under listed agencies or bodies:

Ministry of Finance and Economic Planning

Ministry of Land and Natural Resources

Minerals Commission

Ghana National Petroleum Company

Ghana Chamber of Mines (representing the mining companies)

Office of the Administrator of Stool Lands

Internal Revenue Service

Civil Society Organizations (led by ISODEC)

Ministry of Energy

The EITI also has an implementation Secretariat at the Ministry of Finance and Economic Planning.

#### FINAL REPORT - Aggregation and Reconciliation of Mining Sector Payments and Receipts for 2010 & 2011

# 2.0 SCOPE OF WORK

#### 2.1 MATERIALITY

The companies that participated in the reconciliation process have been chosen based on the payment of royalty. All companies engaged in mineral production, which together contributed up to 99% of royalty payment for the years under consideration (i.e. 2010 and 2011) participated in the reconciliation exercise. (See Appendix 2A-2K)

#### 2.2 REPORTING

# 2.2.1 Basis of Reporting/Currency:

The basis of reporting is cash or actual. Thus only payments/revenues actually made and received in the period under consideration shall be reconciled. The reporting currency is the local currency i.e. Ghana cedi.

#### 2.2.2 Auditing:

All the entities have their financial statements audited by Independent Auditors for 2010 and 2011. None of the Auditors' statements was qualified. The Auditor General of Ghana had completed the audit of all participating government Agencies for 2010 and 2011.

#### 2.3 BENEFIT STREAMS:

Revenue streams for the reconciliation assignment are stated in the Terms of Reference. (See Appendix 1)

#### 2.3.1 MINERAL RIGHTS:

Mineral rights are vested in the state and granted by the Ministry of Lands, Mines and Forestry.

The licences considered here are those that allow the holder the right to enter the land and perform specific tasks.

There are three sequential categories entitling the holder to conduct reconnaissance of, prospect for or mine certain minerals.

#### 2.3.1.1 Reconnaissance Licence.

A reconnaissance licence which covers the first stage in mining operation entitles the holder to search for specified minerals by geological, geophysical and geochemical means.

In general, reconnaissance licences do not permit drilling, excavation, or other physical activities on the land, except where such activity is specifically mentioned by the licence.

Reconnaissance licence is granted for an initial period of not more than twelve months with a renewable option for another twelve months for land area ranging between one block and five thousand blocks. (A block is 21 hectares).

# 2.3.1.2 Prospecting Licence

Prospecting licence which covers the second stage of mining operations entitles the holder to search for stipulated minerals and to determine their extent and economic value.

This licence is granted for an initial period of three years for a land area not exceeding 750 contiguous blocks. The prospecting licence may be extended for a period not exceeding three years in respect of all or for any number of blocks subject for prospecting.

# 2.3.1.3 Mining Lease

When a holder of a reconnaissance licence or a prospecting licence has established that the mineral(s) indicated in the licence is/are present in commercial quantities, an application for a mining lease may be applied for before the expiration of the current licence.

The mining lease is granted for an initial period of thirty (30) years or less as may be agreed upon with the applicant and may be renewed for an additional period of thirty (30) years.

For the purposes of aggregation under the Extractive Industries Transparency Initiative (EITI) only the licensing fees are considered.

#### 2.3.2 MINERAL ROYALTY:

It is a production based tax which is levied on the basis of Section 25 of the Minerals and Mining Act, 2006; ACT 703 which states that 'A holder of a mining lease, restricted mining lease or small scale mining licence shall pay royalty that may be prescribed in respect of minerals obtained from its mining operations to the Republic, except that the rate of royalty shall not be more than 6% or less than 3% of the total revenue of minerals obtained by the holder."

An amendment to section 25 of ACT 703; passed in March 2010, provided royalty payment at 5% of the gross revenue of mineral mined.

Mining Companies are liable to pay royalties immediately they commence mineral production in the country.

Payment of mineral royalties is made quarterly by all Mining Companies.

#### FINAL REPORT - Aggregation and Reconciliation of Mining Sector Payments and Receipts for 2010 & 2011

#### 2.3.3 CORPORATE TAX

Corporate tax is currently fixed at 25% of Net Profit. All the mining companies under consideration are on self-assessment.

Self-assessment companies are allowed to forecast their profits for the year and pay some deposits based on their own assessment.

Companies on self-assessment are however required to submit their yearly returns four months after the end of the accounting year.

In 2012, the country amended the capital allowance rules for the mining sector. Under the new regulations capital allowance is 20% per annum on a straight line basis.

For the purposes of computing capital allowances for mining entities, the following are considered as Assets.

#### *i) Mineral Exploration rights*

- ii) Building, structures and works of a permanent nature which are likely to be of little or no value when the rights are exhausted or the prospecting, exploration, or development ends.
- iii) Plant and machinery used in mining operations.
- iv) Costs incurred in respect of mineral prospecting, exploration and development (are treated as if they were incurred in securing the acquisition of assets).
  - Carry forward of losses.

Mining companies are allowed to carry forward losses arising in any year to the next year for offset against the profit.

The loss must however be deducted within five years following that in which the loss occurred.

#### **2.3.4 GROUND RENT:**

**This** is the annual payment made by mining companies and other companies to the owners of the land.

The participating mining companies operate on stool lands and therefore pay their ground rent to the Office of the Administrator of Stool Lands.

The amount payable as ground rent depends on the size of the concession.

#### 2.3.5 PROPERTY RATE:

Property rates as the name indicates are levies that are imposed on buildings, and plants that are fixed to the ground.

Property rates are determined by the District Assemblies after applying a formula (Rate impost) to valuation figures.

The valuation figures for properties are determined by the District Valuation Board with approval from the Regional Valuation Board.

The District Assemblies collect property rates directly from the mining companies. Some mining companies divide the amount payable into four parts and pay in four installments.

District Assemblies apply property rates from mining companies as internally generated funds.

It is used for recurrent expenditure.

#### *2.3.6 DIVIDEND:*

The Republic of Ghana retains a 10% non-contributing shareholding in every mining lease holder. The government's percentage holding (10%) may be altered in circumstances where special agreements exist.

The Government's share of dividends when declared by the companies is collected by the Non Tax Revenue Unit of the Ministry of Finance and Economic Planning.

#### **2.4 GOVERNMENT REPORTING ENTITIES:**

The Ministries' Agencies' and entities which provided data and information for this assignment included:

- Ghana Revenue Authority (Domestic Tax Revenue Division)
- Ghana Revenue Authority (Customs Division)
- The Administrator of Stool Lands.
- The Minerals Commission
- The Municipal and District Assemblies within the area of operation of the mines covered under the assignment.
- The Ministry of Lands and Natural Resources.
- Non Tax Revenue Agency (Ministry of Finance and Economic Planning).

Table 2.1: Government Agencies and provision of relevant data.

# 4.0 APPROACHAND METHODOLOGY:

The Assignment was categorised into two main phases.

These are i) Inception, ii) Aggregation and Reconciliation

# > Inception phase

This is the preliminary information gathering stage. The Aggregator interacted with Mining companies, Government Revenue Agencies and DistrictAssemblies. An inception report was issued after this phase.

# > Aggregated/Reconciliation Phase

This represented the main thrust of the assignment. It involved the collection and analysis of data.

It also included financial and processing audit.

In executing the assignment we considered a design methodology which was used to request for historical data on mining benefits received by Government. In line with this questionnaires were designed right from the Inception phase to elicit responses from Government Agencies, Mining Companies and District Assemblies.

A combination of desk and field work was employed in the execution of this assignment.

The desktop analysis involved the use of electronic data base management, computer spreadsheets and other software packages.

In order to enable the effective execution of the tasks on schedule, a number of activities were executed concurrently.

#### Document Review

Available documentation was critically reviewed to gain a deeper understanding of the assignment.

Documents identified that were studied included the following:

- a. Reporting Templates
- b. Mineral and Mining Act, 2006
- c. Ghana Chamber of Mines Annual Reports.
- d. Feasibility Studies of participating Mining Companies
- e. Annual reports of participating mining companies
- f. Financial statements of mining companies for 2010 and 2011.

The document review was undertaken throughout the entire length of the assignment.

FINAL REPORT - Aggregation and Reconciliation of Mining Sector Payments and Receipts for 2010 & 2011

#### 4.1 AGGREGATION/RECONCILIATION PHASE

#### 4.1.2 Data Collection:

Data requested from the Departments and Agencies, selected Mining Companies and the relevant District Assemblies was collated and analyzed.

The data collected included amounts paid by participating companies and receipts by the government Agencies.

In addition to data on payments/receipts the reconciler also requested from participating companies, information on capital allowances, production costs and preproduction costs. This information is not provided in detail in the financial statements of companies.

# **4.1.2.1** *Analysis*

Activities undertaken at this stage included:

- the reconciliation of details from Mining sector Agencies and Revenue Agencies,
- Ascertaining the correctness of computations and payments received by each of the agencies with respect to mineral right licence; ground rent; royalty; corporate tax and dividends.
- Comparing payments by Mining Companies to that recorded by Revenue Agencies.
- The reconciliation of payments made by the Head Office of the Administrator of Stool Lands with that of its various regional offices.
- The reconciliation of technical data from Mining Companies with that of the Mineral Commission.
- Data collected from the District Assemblies, was reconciled with that of the Office of the Administrator of Stool Lands.
- Reviewed the accounts of the District Assemblies in respect of mineral royalty, property rates and ground rent. The main objective is to ensure that payments made by the Government to District Assemblies are properly accounted for.

The analysis included reviewing receipts on mineral royalties, Bank Accounts, Cash Books and disbursements made from Mineral royalty accounts.

• Disbursements were then matched against various projects made by the District Assemblies from the mineral royalty accounts.

\_\_\_\_\_\_11\_\_\_\_

# 4.1.2.2 Data reliability check

Data collected from participating entities was scrutinised to ensure that they fully meet the requirements set out for the completion of templates. Data reliability was checked against the following criteria:

- a) Certification:- Templates were checked to ensure that they have been properly endorsed by completing officers with appropriate signatories and official stamps.
- b) Completeness:- Templates submitted by participating candidates were checked to ensure that all requisite responses have been thoroughly completed.
- c) Relevance:- Attached documentations such as receipts and schedules were checked for their relevance to figures and periods provided on the templates.
- d) Correctness/accuracy:- Figures provided in the templates were checked for correctness against receipts or other documentions provided. Also figures on receipts were summed up to ensure they tally with the figures provided in the templates.

#### 4.1.3 Data Aggregation and Reconciliation

Templates were completed for Government and Mining Companies. The process involved:

- i) Developing a composite template for Mining Companies by adding similar benefits from individual Mining Company templates e.g. royalty and dividend paid. This will be shown on company by company basis.
- Providing disaggregated formats of payments and revenues by company, government agency and revenue stream.
- iii) Indicating in detail the discrepancies produced by companies for a revenue stream.
- iv) Comparing consolidated Mining company template (i.e. Composite Mining template) with Government template.
- v) Detailing all discrepancies including those that have been resolved and any unresolved discrepancies.
- vi) Making adequate disclosures to enable users of the information undertake their own investigation of any discrepancy.

FINAL REPORT - Aggregation and Reconciliation of Mining Sector Payments and Receipts for 2010 & 2011

# 5.0 RECONCILIATION

All the participating companies and District Assemblies submitted data. Reported government receipts exceeded company payments for 2010 and 2011. (See Tables 7.1; 7.2; 8.1; 8.2).

Details of reconciliation results have been shown in sections 7.0 and 8.0

#### 5.1 PRODUCTION/ROYALTY ANALYSIS/PRODUCTION COST.

Production of gold, bauxite and manganese maintained steady growth.

However some mines such as Anglogold Ashanti Obuasi and Golden Star Resources Prestea/Bogoso recorded slowed production in the range of 18% and 26% respectively.

Relatively new mines such as Newmont Ghana Gold Ltd and Chirano Gold Mines Ltd maintained the growth pattern.

Table 5.1 shows production movements of the major gold mining companies.

FINAL REPORT - Aggregation and Reconciliation of Mining Sector Payments and Receipts for 2010 & 2011

Gold Fields Tarkwa continues to capture the largest production share in Ghana, closely followed by Newmont Ghana Gold Ltd.

#### 5.2 PRODUCTION/ ROYALTY ANALYSIS.

The analyses of production and royalty payments have been shown in Appendix 4.

The production figures used are those that correspond to the quarterly payments of royalties.

#### **5.3 OPERATING COSTS ANALYSIS**

Mining companies had not submitted their returns for operating costs and cash costs determination at the time of finalizing this report. As a result the Reconciler largely depended on Mineral Commission's uncorroborated report.

Table 5.2 Revenue vrs Operating/Cash costs guide (2010)

# 6.0 DISBURSEMENTS

The allocation of mineral royalty paid by mining companies is according to the formula indicated below:

Beneficiary		Share (%) of Total Amount.
Government in Consolidated Fund		80%
Minerals Development fund		10%
Office of the Administrator of Stool Lands	10% Of Total Amount	
<ul> <li>The Administrator of stool Lands takes 10% of the amount received to cover administrative expenses.</li> <li>The remaining 90% is distributed as follows.</li> </ul>		1%
	55%	
• Stools	25%	2.25%
Traditional Councils	20%	1.80%
TOTAL		100%

Source: Administrative fiat of 1999(letter no.AB.85/156/01)

Thus District Assemblies, Traditional Authorities and Stools within the operational areas of mining companies receive 4.95%, 1.80% and 2.25% respectively of royalties paid by mining companies.

Source: Government Agencies' Reporting Templates

No company reported mineral right licence payment for concessions under production.

• *Ground Rent.* 

No ground rent payment was reported.

• Mineral Royalty

Mineral royalty payment reported by companies amounted to GHS 147,848,789.

However reported Government receipts was GHS150,453,905. Reported payments and receipts based on templates submitted by participating companies are shown. (See Tables 7.1, 7.2 & Fig 7)

# • *Corporate tax:*

Four companies reported corporate tax payments in the year 2010. These were Anglogold Ashanti Iduapriem, Ghana Manganese Company Ltd, Gold Fields Ghana Ltd, Tarkwa and Abosso Goldfields Ltd (see Table 7.1). Although Anglogold Iduapriem did not report of corporate tax in the initial template, during the resolution of discrepancies, it reported the payment of GHS8, 567,348. (See Appendix 5A)

The reasons why the following companies did not pay corporate taxes included the following:

Golden Star Resources Wassa Ltd had enough capital allowances and allowable deductions to cover assessable profit.

Anglogold Ashanti Obuasi also had enough capital allowances to cover its assessable profit. Anglogold Ashanti had Capital allowance carried forward of US\$585,323,279 at the end 2010.

Chirano Gold Mines had capital allowances together with other deductions of US\$130,809,019 enough to set off against the assessable profit.

Newmont Ghana Gold Ltd set off capital allowance of US\$358,492,201 against assessable profits of same magnitude.

Golden Star Resources (Prestea/Bogosu) set off US\$20,736,783 of capital allowance and other deductible allowances against its assessable income resulting in non-payment of corporate tax. There was an unutilized capital allowance of US\$396,939,651 for GSR Prestea Bogosu at the end of 2010.

Ghana Bauxite did not pay corporate tax because it had a negative assessable income. Ghana Bauxite Ltd had capital allowance carried forward of US\$10.029, 331 at the end of 2010.

The reconciliation produced absolute discrepancy of GHS47, 460,012 and net unresolved discrepancy of GHS (5,080,964), which indicated that Government Agencies reported receipts exceeded company reported payments. This was mainly due to the fact that Government/Non Tax Revenue Unit's reported receipt of dividends from Abosso Goldfields Ltd was not corroborated by the company (See Appendix 5A) for details.

#### 7.5 MINERAL DEVELOPMENT FUND

This section discusses the utilizations of the ten percent (10%) ceded funds from mining sector royalty receipts lodged into the Mineral Development Fund (MDF) account for the years 2010 and 2011.

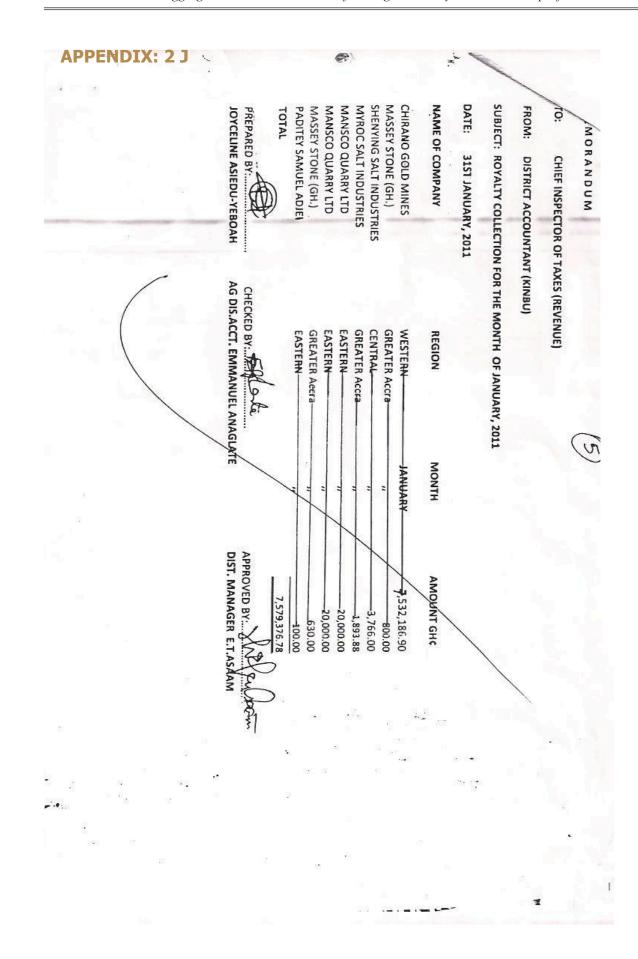

The expenditures of mining sector operators and institutions accessing this account are grouped under salaries/transfers, developmental/service activities and travel expenses/others. The tables show (See Appendix 7) the lodgments and expenditures made into/from the MDF account for the years 2010 and 2011.

# 7.5.1 ROYALTY LODGEMENTS AND EXPENDITURES FROM THE MDF ACCOUNT IN 2010

Royalties paid into MDF account at Bank of Ghana by the Controller and Accountant General and funds expended from the account in 2010 are shown in Appendix 7

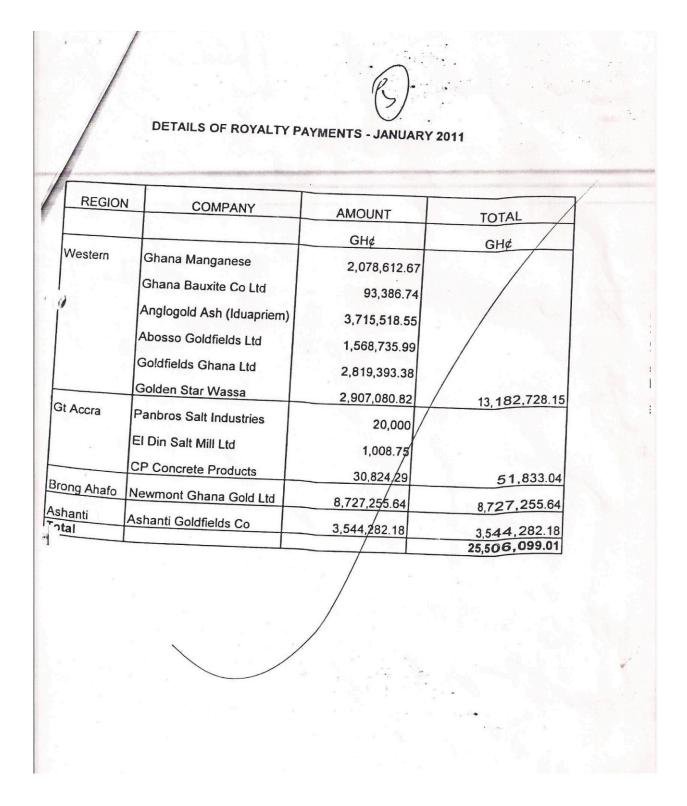

Total lodgments into the MDF account in 2010 amounted to GHS16.204 million with GHS11.398 million as withdrawals.

Expenditure analysis of the outflows indicates that GHS3.601 million was spent on salaries and salary related expenditures on a distressed mining company, GHS7.771 million on developmental and service activities of state agencies/institutions in the mining sector with GHS 24,206 expended on overseas travels.

# Mineral Right Licence:

There was no payment of mineral right licence on concessions under production in 2011.

# Ground Rent:

Only Ghana Manganese Ltd reported payments of ground rent.

# Property Rate:

Seven companies reported the payment of property rate. All companies with the exception of Newmont Ghana Gold Ltd is liable to pay property rate.

# Mineral Royalty:

Reported mineral royalty payment amounted to GHS 211,708,024 whilst the GRA reported receipts of GHS 218,151,362.

# Corporate Tax:

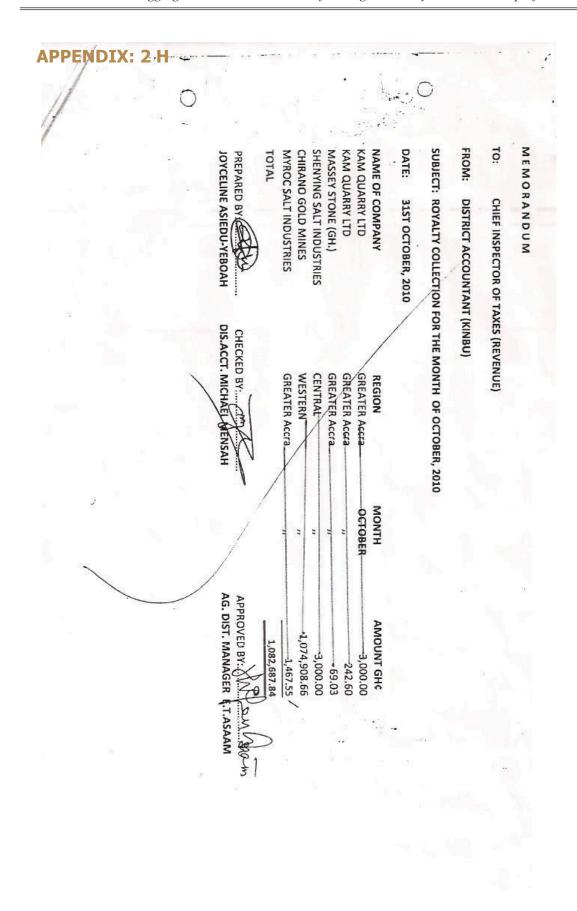

Six companies namely Ghana Manganese Ltd, Anglogold Ashanti-Iduapriem; Chirano Gold Mines Ltd; Abosso Goldfields Ltd, Gold Fields Ghana Ltd and Newmont Ghana Gold Ltd paid corporate tax payments in 2011.

Capital allowances carried forward at the end of 2011 ranged from US\$48,862 to US\$509,272,373.

Anglogold Ashanti and GSR (Prestea/Bogosu) did not pay corporate tax due to their strong capital allowance positions.

# Dividends:

Anglogold Ashanti International paid dividends in 2011. Anglogold Ashanti International operated two mines (Anglogold Ashanti-Iduapriem and Anglogold Ashanti-Obuasi) in Ghana. Other companies that paid dividend included Ghana Manganese Ltd and Gold Fields Ghana Ltd.

#### 8.6 ROYALTY LODGEMENTS AND EXPENDITURES FROM THE MDFACCOUNT IN 2011

Appendix 7 shows royalties paid into MDF account at Bank of Ghana by Controller and Accountant General and monies expended from the account in 2011.

Total lodgments into the MDF account in 2011 amounted to GHS16.080 million with GHS9.230 million as withdrawals for mining sector expenditures.

The expenditure analysis indicates that GHS 889,714 was spent on salaries and salary related expenditures on a distressed mining company, GHS 8.341 million on developmental and service activities of mining sector agencies and institutions with GHS 31.00 spent on incidental expenses.

# 9.0 CHALLENGES IN IMPLEMENTATION

- Ø The 2010/2011 encountered a lot of challenges. The major challenge was the provision of relevant data. Since the entire reconciliation exercise hinges on data obtained from participants, the acquisition of data is on the critical path of the process. Any delay affects significantly the timely completion of the exercise.
- Ø The high turnover of staff within the Mining companies also posed a lot of challenges. Staff members with understanding of the process left the employment of their companies in the middle of the process. Mining Companies are advised to open up the EITI process to more staff members in functional areas that provide inputs for the reconciliation process.
- Ø Another challenge was the timing of the exercise. It is recommended that as much as possible the last three months of the calendar year should be avoided since during that time, participants are usually engaged on various audit activities in fulfillment of company's statutory requirements. As such EITI requests are oftentimes placed on secondary priority.
- Ø The SAP IT solution did not provide the anticipated impetus. It is recommended that its contribution be reviewed as it has the potential to reduce the reporting period.

#### FINAL REPORT - Aggregation and Reconciliation of Mining Sector Payments and Receipts for 2010 & 2011

#### **Appendix 1: TERMS OF REFERENCE:**

The terms of reference for the assignment are as follow:

Under the terms of reference for the assignment the obligations of the aggregator shall include the following: For the mining sector,

The Aggregator shall perform both process and financial audit.

The Aggregator shall analyse the historical documentation on production, exports and payment of royalties for minerals produced in the country.

In carrying out his mandate the Aggregator shall have access to the company's lease, stability or development agreements with government.

More specifically the Aggregator shall undertake the following activities:

- 1. Analyze the documentation on production, exports, payments and receipts from solid minerals in the country for the period 2010 and 2011.
- 2. Review feasibility reports of Mining Companies in order to compare projected production with the actual production.
- 3. Where applicable, check if quantities of solid minerals declared are in conformity with the declarations made to the regulatory institution and as captured in the refinery certificates.
- 4. Review the capital investment made by the companies in order to assess the actual amount of the investment and determine if the amortization and depreciation declared are correct and do not unduly reduce the amount of taxable profit of the mining companies.
- 5. Check the correctness of the computation of payments, in order to determine the appropriateness of the revenues received as mineral royalty, dividends, tax on profit property rate, ground rent and mineral rights.
- 6. Analyzed all tax deduction claimed by the companies, to ensure that only legitimate claims have been made.
- 7. Scrutinize the payment made to District Assemblies, within the operational areas of the mines.
- Reconcile the data so collected to ascertain, where applicable, if there is any disparity between the government's reported template and the aggregated companies reporting template and make appropriate recommendations to deal with the disparities.
- 9. Review financial statements of companies and institution for consistency. Specifically, for companies, the aggregator shall review company capital investments and operating costs.
- 10. The aggregator shall report on amount accruing to the Minerals Development Fund and how the funds have been utilized.

FINAL REPORT - Aggregation and Reconciliation of Mining Sector Payments and Receipts for 2010 & 2011

## 10.0 OBSERVATIONSAND SIGNIFICANT FINDINGS.

# **10.1 Reporting Currency in Reconciliation Exercise:**

The GRA has requested mining companies to pay royalty and corporate tax in US dollars. Although the receipts provided by the GRA are all in cedis, most of the mining companies provide templates with US\$ as the reporting currency.

The GRA provides receipts in cedis for dollar payments. Some companies are unable to provide amounts paid in cedis. This creates unnecessary discrepancies and delay reconciliation exercise.

# 10.1.1 Recommendation:

In order to avoid discrepancies created by currency translations it is important that the companies provide figures in cedis as found on the receipts provided by the GRA. The GRA should also endeavor to keep records of all US dollar payments by companies.

-The GRA'S request to companies to make payments in US dollars may necessitate reviewing the currency for EITI reporting.

# 10.2 Submission of additional information by participating companies.

Participating companies were willing to provide information on payments made to government on the revenue streams. However they appear reluctant to provide details on production costs and other information required to fully meet the terms of reference.

Undue delays arise from waiting for such information. The reconciler, due to time constraints had to conclude the report without the provision of the relevant information.

#### 10.2.1 Recommendation:

The Steering committee should deliberate with representatives of the participating companies on the need to provide additional information other than payments to the government.

The terms of reference may be amended in accordance with the outcome of such interactions.

# 10.3 Mineral Royalty:

Mineral royalty, which is a production based tax is paid quarterly. In the years 2010 and 2011, some companies such as Goldfields Ghana Ltd, Abosso Goldfields Ltd and Newmont Ghana Gold Ltd, paid royalties more than four times. For example in 2011 Newmont Ghana Gold Ltd paid royalty on eight separate occasions.

Whilst the frequency of payments in the case of Newmont Ghana Gold Ltd may have resulted from its decision to pay royalties on monthly basis, it was not clear the reasons

37

behind the payments by Gold Fields Ghana Ltd and Abosso Goldfields Ltd.

The consequence is that it was a challenge establishing whether the correct amounts have been made. This is because royalty payment is based on production. Without specific periods of payments indicated, matching production against royalty proved challenging.

Additionally companies may result in splitting the payment of royalties.

#### 10.3.1 Recommendations:

It is very important to establish the frequency of payment of royalty. The regulations on royalty payment that sought to introduce monthly royalty payments should be implemented. This will ensure transparency.

With the ageing mines experiencing negative growth, it signals a potential national output slum if strategic investments and decisions are not made now.

# 10.4 Hedged Prices.

The issue of payment of royalties on hedged gold sales appears to be persisting. An example is Adamus Resources which have posted consistently reduced incomes resulting from hedge prices from July to Dec 2011. See below.

Table 10.4.: Adamus Resources hedge and spot price analysis

DATE	GOLD (OZ)	HEDGE	SPOT	DIFF(\$)	ADD REVENUE	ADD ROYALTY(\$)
7/7/11	543.24	1074.03	1527.8	453.77	246,508.28	12,325.41

# **APPENDICES**

# FINAL REPORT - Aggregation and Reconciliation of Mining Sector Payments and Receipts for 2010 & 2011

# 11.0 CONCLUSION

- The reconciliation report for 2010 and 2011 produced some discrepancies that should be investigated further. Absolute discrepancies for 2010 and 2011 were GHS 47,460,012 and GHS 202,828,263 respectively. Unresolved discrepancies amounted to GHS -5,080,964 and GHS 9,113,673 in 2010 and 2011 respectively.
- ➤ Due to time constraints, the reconciler was unable to resolve all the discrepancies produced. The companies and Government Agencies have been asked to produce further details to assist in the resolution of the discrepancies.
- Corporate tax payments exceeded mineral royalty in 2011. This is very significant as it may mark the end of the initial investment recovery periods for major producers such as Newmont Ghana Gold Ltd. The implementation of the Internal Revenue (Amendment) Act,2012 ACT 839, which abolishes the 80% first year capital allowance and also deals with ring fencing matters may further improve the collection of corporate tax.
- Regulations on payment of mineral royalty need to be addressed. On the implementation of the EITI process, stakeholders should discuss in detail the way forward especially with regards to the provision of relevant data for reconciliation.

i Adamus Resources Ltd commenced production in the fourth quarter of 2010. First payment of royalty was in 2011.

As indicated above, in the 3<sup>rd</sup> quarter 2011, about \$ 238,995 was lost through gold hedging. Adamus Resources Ltd did not indicate any royalty payments for silver by-product associated with gold production in 2011.

#### 10.4.1 Recommendation:

The GRA is requested to review Adamus royalty payments and also ensure that royalty payments by all companies take the spot price into consideration.

Silver revenue should also be included in the computation of royalty.

#### 10.5 Transfers in Tranches:

Some regional offices of the OASL did not transfer in full amounts due to District Assemblies. For example the Brong-Ahafo regional OASL office received a transfer of royalty from the head office on 15/2/2010. However Asutifi District was paid in two tranches of GHS 263,394.48 and GHS278926.85 on the 2/3/2010 and 1/4/2010 respectively.

## 10.5.1 Recommendation:

District Assemblies should be paid in full and immediately when funds are received from Accra. Amounts due to District Assemblies should not be paid in tranches.

#### **10.6 Omission of Funds:**

During the disbursement of funds to District Assemblies, some of the receipts are left out. This means the District Assemblies don't receive funds on timely basis. For example the transfer of March 2011 was for royalties paid from August-October 2010. The next transfer in September related to royalties paid in January February 2011. Thus payments for November and December 2010 were omitted. Meanwhile several companies including Ghana Bauxite Ltd, GSR(Wassa)Ltd, GSR(Prestea/Bogosu) and Ghana Manganese Ltd made royalty payments in November 2011. Thus District Assemblies that receive royalties from these companies shall be denied funds for that transfer.

## 10.6.1 Recommendation

When disbursing royalties, it is important to include all the months. This should be irrespective of whether it is the end of the quarter or not. This will ensure that payments made by companies outside the designated months are captured. The GRA should ensure that companies do not pay royalties outside the stipulated months by applying the necessary sanctions. The GRA indicated during interactions that it had already taken notice of the anomaly and is working on it.

ii Operating cost determination may vary among companies

iii Shareholding percentage as 31st December, 2010.

iv Amount due is computed using payments made to the GRA by mining companies. It may be different from the releases to the OASL.

v Sharing ratio revised in December 2010 after payment.

Waste management still takes a significant portion of royalty utilization.

In 2010 waste management accounted for 40% of royalty utilization in Obuasi.

Although in 2011 waste management was 30% of royalty expenditure, it was still significant.

#### 10.7.1 Recommendation:

Guidelines for the utilization of royalty receipts by District Assemblies should be implemented as early as possible. This will ensure that District Assemblies do not spend substantial amounts of royalty receipts on recurring expenditure such as waste collection.

# 10.8 Corporate Tax:

In computing corporate tax payable, Adamus Resources separated its pre-production costs into losses carried forward and plant and machinery costs that qualified for capital allowance:

The Mining and Minerals Act(section 28) stipulate that 'the holder of a mining lease is entitled to the capitalization of expenditure on reconnaissance and prospecting approved by the Minister on the advice of the Minerals Commission where the holder starts development of a commercial find.

#### 10.8.1 Recommendation:

Companies commencing exploitation of minerals should be made to capitalize all exploration and development costs and amortize over five years i.e. 20% per annum. Allowing losses to be carried forward separately before capital allowances are set off against profits may result in prolonging the time for payment of corporate tax.

# 10.9 Mineral Development Fund

There seems to be significant improvement in royalty transfers to the Fund compared to the recent past. Inflows into the account in 2010 and 2011 exceeded outflows from the Fund. Some lodgments appear not to be tailored to royalty transfer made into the account as was the practice in the recent past.

The Ministry of Lands and Natural Resources which is supposed to have the oversight and monitoring role over the state agency managing the Fund currently plays the role as spending agency. This creates supervisory and monitoring challenges to the Ministry. Sometimes it becomes difficult to track expenditures made from the Fund to the source documents in the accounting books of the Ministry. This is because funds are sometimes

FINAL REPORT - Aggregation and Reconciliation of Mining Sector Payments and Receipts for 2010 & 2011

transferred in bulk from the MDF account to the Ministry's subsector account for onward disbursements to mining sector beneficiary agencies and institutions.

Moreover, since the Ministry has no signatory authorization to the MDF account at Bank of Ghana it becomes difficult for it to request for MDF bank account statement from the Bank of Ghana for reconciliation purposes.

#### 10.10.1 Recommendation

To ensure effective monitoring and supervision of the Fund, an interim oversight agency should be appointed to run the Fund prior to the appointment of a substantive Fund Manager. This will enable the sector Ministry to play its supervisory and monitoring role effectively during this period of transition.

40\_\_\_\_\_\_
