The Ghana EITI together with GTZ and SAP are underway to implement the IT reporting base software. In this regard, a training workshop was organized for the end users of the software and other relevant stakeholders. The purpose of the training was to give end users a hands on training for the use of the software.

The participants included government institutions, extractive companies and Municipal/District Assemblies in the mining areas. The training session was held at the IT training room of the Ministry of Finance and Economic Planning from the 7th-9th December, 2010.
